

MICHAEL
LANGLEY
ARCHITECTURE

Bickleigh Crescent

Our clients came to us with a brief to transform the living space and to add a master bedroom suite in the loft space of their existing 1990's traditional detached property in Furzton, Milton Keynes.

MLA opted to transform the living space with a large single-storey rear extension comprising light wells and large sliding doors, flooding the deep plan with natural light. The extension was linked to the living room through two large openings in the existing wall, creating a seamless relationship between the kitchen and living room. On the upper floors, a large dormer loft conversion was erected offering a master suite with walk-in wardrobe and en-suite. With the completed works the property offers 5 double bedrooms with 3 en-suites and a large open plan family living area.

MLA was instructed to obtain planning permission, building control approval and on-site liaison with contractors.
